Profile

Backend engineer with 5+ years in fintech, plus React/TypeScript and mobile work in independent products. Use AI agents daily; own development, deployment and production maintenance.

Core skills

Backend: TypeScript, Node.js, NestJS, Fastify, REST APIs, PostgreSQL, TypeORM, Drizzle ORM

Frontend: React, TypeScript, React Query, Zustand; React Native / Expo in independent products

Reliability: RabbitMQ, Redis, transactional outbox, circuit breakers, idempotency, rate limiting

Delivery: Kubernetes (DigitalOcean), Docker, Helm, GitLab CI/CD; Prometheus, Grafana, Loki, Sentry

AI / integrations: OpenRouter, OpenAI API, streaming, BullMQ, AWS S3

Experience

Backend Engineer | AI chat product (contract)

September 2026 - present

AI chat product for web and Telegram; NestJS, PostgreSQL / Drizzle and BullMQ.

- Integrated OpenRouter models; worked on provider errors, token refunds and per-call cost accounting, including failed requests and retries.

Backend Engineer to Senior Backend Engineer | Crypto/fintech Telegram super-app

January 2021 - June 2026 | Remote

Consumer product with payments, wallets and an AI assistant. Intern in 2020; senior since 2023.

- Co-designed subscriptions, then owned 8+ payment integrations: Stripe, Apple App Store, Google Play and Telegram Stars. Covered webhooks, renewals, retries and refunds.
- Built an API gateway handling around 700 requests per second, with autoscaling and per-endpoint rate limits on a three-shard Redis cluster.
- Implemented RabbitMQ / transactional outbox workflows and circuit breakers. Worked on Kubernetes deployment, CI/CD, monitoring and migration of legacy NestJS services.
- Built wallet services across 9+ blockchain networks and designed the wallet's fiat exchange: one API over MoonPay, Paybis and Mercuryo adapters. Shipped an OpenAI assistant with streamed responses.

Independent products

TeachTrack | React / TypeScript / NestJS / PostgreSQL | teachtrack.ru

Shipped tutor SaaS with scheduling, invoicing, Telegram reminders, OTP/2FA and observability.

TripTrack | NestJS / PostgreSQL / Swift | trip-track.app

Published an iOS road-trip tracker with GPS, map exploration, JWT/JWKS, S3 photos, APNs and CI/CD.

LifeTrack | SwiftUI / React Native / Expo

Shipped iOS/Android habit trackers with streaks and progress heatmaps.

Education

B.Sc., Information Systems and Technologies | Kuban State University | 2018 - 2022

anabin: university H+; degree type equivalent (Entspricht).

Languages and work authorization

Russian: native | English: B1 | German: A2

German work authorization required; ready to handle visa application after a qualifying offer.
